Hongkong Tidos.

The Tide Table given below has been compiled by the Nautical Almanac Office in London from the result of the analysis. of observations taken by means of an automatic tide-recording machine in the Wa-ter Police Basin at Tsim Sha Tsui during

the years 1887-8-9. The zero of the table is Low Water, Ordinary Spring Tides, which has been found to be 2 feet below mean sea level. To obtain the depth of water on the tide gauge at the Victoria Naval Yard add 5 ft. 7 in., and on the gauge at Lamont Dock, Aberdeen, add 12 ft. 9 in. to the height given in the table.
